

ARTIFICIAL INTELLIGENCE

GOVERNMENT ARTS COLLEGE (AUTONOMOUS) - KARUR-5

UNDER THE GUIDANCE OF
Dr. C. JAYANTHI, M.Sc., M.Phil., Ph.D.,
ASSOCIATE PROFESSOR

SUBMITTED BY
DHIVYADHARSHINI. G
252511- II-M.Sc (c.s)

ABSTRACT & DURATION

This internship was completed at INTER DECCAN SOLUTIONS, where I gained a strong foundation in Artificial Intelligence and Python programming. During the internship, I studied key AI concepts such as machine learning, natural language processing (NLP), computer vision, intelligent agents, and search algorithms. As part of the practical training, I developed a Campus Information Assistant project, which helped me apply the concepts learned in a real-world scenario. Overall, the internship enhanced my technical knowledge, problem-solving abilities, and AI development skills while providing valuable industry exposure.

DURATION: 11 MAY 2026-25 MAY 2026 (15 DAYS)

INTRODUCTION

Artificial Intelligence enables computers to perform human-like tasks. AI can learn, reason, solve problems, and make decisions. AI uses data, algorithms, and machine learning models.

Major AI areas include:

- Machine learning
- Natural language processing(NLP)
- Computer vision
- Knowledge-based AI

OBJECTIVES

- Understand AI fundamentals.
- Learn Python for AI development.
- **Study machine learning concepts.**
- **Explore neural networks and deep learning.**
- **Learn natural language processing.**
- **Understand computer vision.**

TECHNOLOGIES USED

- Python: ai programming language
- SQL: data storage and retrieval
- Jupyter notebook: ai experiments
- Numpy & Pandas: data processing
- Matplotlib: data visualization
- Scikit-learn: machine learning
- Tensorflow & pytorch: deep learning
- Opencv: computer vision
- Git: version control

PROS AND CONS

PROS

1. **Saves Time** – AI completes tasks quickly and improves productivity.
2. **Reduces Human Errors** – AI provides accurate results when properly trained.
3. **Works 24/7** – AI systems can operate continuously without getting tired.

CONS

1. **Job Displacement** – Some jobs may be replaced by automation.
2. **High Development Cost** – Creating and maintaining AI systems can be expensive.
3. **Security - Privacy and Security risks.**

CONCLUSION

- Learned the fundamentals of artificial intelligence.
- Gained hands-on experience with python and ai tools.
- Understood machine learning, nlp and computer vision.
- Developed a basic ai application.
- Built a strong foundation for advanced AI learning.

THANK YOU!
